

6 STEPS. NONE SKIPPED.

ANSWER EVERY LEAD IN UNDER 60 SECONDS.

Not an AI problem. A plumbing problem.

STEP 1

PICK THE **ONE** PLACE LEADS ACTUALLY ARRIVE.

Meta lead form, website form, WhatsApp, missed call.

Pick the one that carries the most and ignore the rest until it works.

Most people fail here, trying to catch all four on day one.

STEP 2

GET IT OUT OF YOUR NOTIFICATIONS.

A notification is not a system. It depends on you being awake, unbooked, and holding your phone.

n8n trigger:

Meta Lead Ads node

or Webhook the form posts to

STEP 3

WRITE THE FIRST REPLY YOURSELF.

Four lines maximum. Do not let a model improvise in front of a stranger who is about to spend money with you.

The system's job is speed. Not judgment.

STEP 4

ASK THREE QUESTIONS **IN THE SAME THREAD.**

Scope. Timeline. Rough budget range. Not a form, not a link to a form.

People answer questions in a chat they already opened. They abandon forms.

STEP 5

ROUTE BOTH OUTCOMES. **NEVER LEAVE SILENCE.**

Clears the bar: calendar link in the same thread, while the phone is still in their hand. Does not clear it: still a real answer.

Ghosting somebody politely is still ghosting them.

STEP 6 • THE ONE EVERYONE SKIPS

ADD THE **HEARTBEAT.**

Errors alert you. Silence does not. You need an alert that fires when the workflow has NOT run.

DROP THE REAL SCREENSHOT HERE
the 5-node error workflow on the n8n canvas,
cropped tight so all five nodes are legible

STEPS 1-5 WIN THE LEAD. STEP 6 IS WHY IT STILL WORKS IN MARCH.
