

Prompt to Pipeline

Turn one smart prompt into an automated lead-qualification pipeline using AI.

Usama Ayoub • Personal Brand

Why automate lead qualification?

Save time, focus reps on high-value prospects, reduce human bias, and improve conversion rates.

Goal: Fast, consistent lead decisions

Automatically score and route inbound leads so sales acts only on high-fit opportunities.

Usama Ayoub • Personal Brand

Step 1 — Define success

Decide what “qualified” means: industry, company size, budget, timing, decision authority.

Usama Ayoub • Personal Brand

Step 2 — Write the prompt

Create a single, clear prompt that extracts the fields you need and outputs a score + reason.

Usama Ayoub • Personal Brand

Copy this prompt

```
You are an expert B2B SDR. Given lead data (company, role, industry, revenue, pain points), output JSON: {score:0-100, reasons:[...], action: ['email', 'call', 'nurture'], priority: ['high', 'medium', 'low']}. Explain score in 1 sentence.
```

Step 3 — Feed data to the model

Hook your form, CRM, and chat transcripts to send incoming lead data into the prompt automatically.

Usama Ayoub • Personal Brand

Step 4 — Add business rules

Combine AI score with rules (e.g., $\text{score} > 70 + \text{company size} > 500 \Rightarrow \text{assign to AE}$). Keep rules simple and auditable.

Usama Ayoub • Personal Brand

Step 5 — Trigger actions

On qualification: create CRM task, send personalized email, and notify rep in Slack. On low score: add to nurture sequence.

Usama Ayoub • Personal Brand

Step 6 — Track & retrain

Log AI outputs, rep feedback, and outcomes. Periodically retrain prompts and rules using failed/converted examples.

Usama Ayoub • Personal Brand

What to measure

Qualified rate, conversion from qualified to opportunity, time-to-contact, false positive rate, and rep override frequency.

Usama Ayoub • Personal Brand

Build responsibly

Audit decisions, keep human-in-the-loop for high-impact cases, avoid protected attributes, and store data securely.

Usama Ayoub • Personal Brand

Real result (example)

After automation: 60% fewer manual screens, 30% faster contact time, and 18% lift in qualified-to-opportunity conversion.

Usama Ayoub • Personal Brand

7-step checklist

1. Define qualification
2. Draft prompt
3. Integrate sources

4. Add rules
5. Automate actions
6. Log outcomes
7. Retrain monthly
